

## Inverse problems A

We can write out sums in different ways in order to check them. For example:

$$18 + 12 = 30$$

could be checked by using the sums:

$$12 + 18 =$$

$$10 + 10 + 2 + 8 =$$

$$30 - 12 =$$

Work out the following sums and then rewrite them to check if your answers are correct.

1)  $13 + 17$

9)  $12 + 33$

2)  $14 + 16$

10)  $32 - 11$

3)  $11 + 9$

11)  $12 + 59$

4)  $6 + 3 + 13$

12)  $12 + 18 + 20$

5)  $21 + 5$

13)  $10 \times 3$

6)  $24 - 7$

14)  $40 + 36$

7)  $32 - 9$

15)  $35 \times 2$

8)  $23 + 14$

16)  $23 \times 2$
